Detective Lance Waller has handled some bizarre cases. But nothing has prepared him for Amy Schaeffer who claims her missing father was abducted by aliens and not murdered. Investigating, Lance is even more puzzled, especially when Amy tells him about her fathers unusual past and his claim that aliens will soon be harvesting their specimens. Even worse, Amy believes she has been tagged, making her afraid she will also disappear under questionable circumstances. Lances tries to allay Amys fears even as he grudgingly starts believing her story because of the mounting evidence hinting something strange is happening to people. Then, unexpectedly, Lance is accosted by a glowing object which bathes him in a brilliant white beam, and he awakens to find himself a prisoner in a cubicle flooded with an amazing blue light which keeps him frozen in place. Finally released after witnessing some horrifying acts of testing and culling on his fellow abductees, Lance is instructed to proceed to a Gathering area where he finds Amy and learns they are about to be deposited on P4368721 --- an inhospitable planet which holds the key to their survival. If they are able to reach a red transporter staff before their fellow prisoners, they will be safely returned to the spaceship. Otherwise, they will be left behind to die. As the deadly race begins across P4368721, and as Lance tries to understand the clues suggesting why they have been abducted, he discovers there are even more surprises on the planet, including one which may lead to an incredible secret and possibly save their lives even if they lose the race.
