

ISO/IEC 13888-2:1998, Information technology - Security techniques - Non-repudiation - Part 2: Mechanisms using symmetric techniques (publi? en anglais seulement)

The goal of the non-repudiation service is to generate, collect, maintain, make available and validate evidence concerning a claimed event or action in order to resolve disputes about the occurrence or non occurrence of the event or action. This part of ISO/IEC 13888 provides descriptions of generic structures that can be used for non-repudiation services, and of some specific, communication related mechanisms which can be used to provide non-repudiation of origin (NRO), non-repudiation of delivery (NRD), non-repudiation of submission (NRS), and non-repudiation of transport (NRT) services. Other non-repudiation services can be built using the generic structures described in Clause 8 in order to meet the requirements defined by the security policy. This part of ISO/IEC 13888 relies on the existence of a trusted third party (TTP) to prevent fraudulent repudiation. Usually an on-line trusted third party is needed. Non-repudiation mechanisms provide protocols for the exchange of non-repudiation tokens specific to each non-repudiation service. Non-repudiation tokens used in this part consist of Secure Envelopes and additional data. Non-repudiation tokens shall be stored as non-repudiation information that may be used subsequently in case of disputes. Depending on the non-repudiation policy in effect for a specific application, and the legal environment within which the application operates, additional information may be required to complete the non-repudiation information, e.g., evidence including a trusted time stamp provided by a Time Stamping Authority, evidence provided by a notary which provides assurance about the action or event performed by one or more entities. Non-repudiation can only be provided within the context of a clearly defined security policy for a particular application and its legal environment. Non-repudiation

policies are described in ISO/IEC 10181-4. This title may contain less than 24 pages of technical content.

Skip to content Fitness & Diet Experts Exercise & Nutrition Matters! Menu Home About Us Terms and Conditions Privacy Policy Contact Us Personal Trainers & Bodybuilding Choosing a Personal Trainer(Personal Trainers & Bodybuilding) Why a trainer might be appropriate for you Selecting a personal trainer may be a step in the direction that is right if you desire to lose weight, get healthy and/or build muscle. A great coach can assist you to set up a plan that meets your aims and educate you the greatest way to exercise. Finding and selecting a trainer may be daunting a bit confusing and, for some. It is challenging going in with extra information about how fitness works can allow it to be a little simpler, although requesting assistance. (Personal Trainers) What is a Personal Trainer? A personal trainer should be, at the very least, educated and certified through a recognised fitness organization (see below). This individual's job will be to assess your level of fitness, figure out what your aims are (or help you establish targets) create a plan and keep you motivated. She or he will push you beyond your comfort level — something tough to do by yourself. A trainer additionally provides:

1. Guidance on achieving your goals
2. Instruction about fundamental nutrition, cardio and bodybuilding
3. Each week a reason to appear at the gym
4. Accountability
5. Methods to assist monitor your improvement

What is a Program Like? Each session typically lasts about an hour. The first meeting is dedicated to assessing body measurements, fitness level, health and workout background and goals. Be ready to step on the scale, have your body fat measured and answer questions that were particular about your goals. After this, you'll spend each session performing cardiovascular exercise, weight-training, flexibility or other activities depending on what your aims are. Your trainer will show you give you tips for getting the most out of each workout, enable you to determine how much weight to use and just how to do the exercises. What to try to find In a Personal Trainer

1. Education: A personal trainer should be accredited through a recognised personal training organization. The more education your trainer has, the better your workouts will be, although a workout science or other related college degree isn't crucial.
2. CPR: your coach should have an updated qualification in CPR and/or firstaid.
3. Experience: Make sure your trainer has expertise, particularly with regards to your goals. As an example, if you are a bodybuilder, you want some body educated in that area.
4. Details: If you've got a particular clinical issue, injury or illness (such as being pregnant, difficulty becoming pregnant, heart troubles, diabetes, etc.) ensure your trainer has education in these fields and communicate with your doctor.
5. A good-listener: A good trainer ensure he comprehends your aims and should listen carefully to what you say.
6. Attention: A good trainer should be targeted only during your sessions on you.
7. Monitoring improvement: A great coach will often assess your progress and alter things if necessary.
